

**Amendments to the Specification:**

*Please add the following new paragraphs after paragraph [0042] of the published application:*

[0043] Figure 6 is a semi-log plot of mean plasma and blood concentrations of propofol (in ng/mL) versus time (in minutes) following administration of single intravenous boluses of two novel propofol compositions (C and D) and Diprivan® Injectable Emulsion control (doses of 10 mg/kg) to Sprague-Dawley male rats.

[0044] Figure 7 is a plot of mean predicted propofol concentrations (in ng/mL) in red blood cells (RBC) versus time (in minutes) following single intravenous doses (10 mg/kg) of a novel propofol composition, Formulation C (-●-), and a commercially available propofol emulsion, Diprivan® Injectable Emulsion (-o-), in male Sprague-Dawley rats.
